BRIEF COMPANY PROFILE

With all respects we wish to introduce BITEC INTERNATIONAL CO. LTD, a fully registered Mechanical Engineering Construction Company.

BITEC INTERNATIONAL is registered by the Contractors Registration Board CRB under **Class three** (MECHANICAL CONTRACTORS)

Our registered offices are located at URAFIKI FLATS ALONG MOROGORO ROAD, BLOCK M ,NO 10 (OPPOSITE URAFIKI TEXTILE) KINONDONI District, Dar Es Salaam.

HISTORICAL BACK GROUND

With a wide range of experience in design, construction and operations of Petroleum Industries and facilities, the founders of Bitec envisaged the need to incorporate Business and Technical Know how in order to provide the best solutions to its clients in the Petroleum Industry. and steel structures. The idea was to see to it the customers don't just build their facilities, but do it in an economically viable manner.

BITEC was incorporated in December 2005 with the idea of serving both the Business and Technical needs in the Petroleum Storage and Marketing Industry. From the very beginning the vision was to go beyond Tanzania borders. Hence the acronym:

B (Business)
I (integrated)
T (with technology)
E (and Engineering)
C (Construction)

Construction of Petroleum Storage Facilities

On this field BITEC can carry out all the professional works ranging from Project Conception, Design of Layouts of Facilities and Depots including Vertical fuel storage tanks, Horizontal tanks, Loading gantries and Forecourts, Product Filling and Offloading facilities, Fire fighting systems, Floating decks and Tanks internal lining, Sampling and Quick Flush tanks, and all Tanks Gauging and Metering devices.

SOMALI FUEL DEPOT
UNDER CONSTRUCTION 2014

Construction of Service Stations

This includes layout designs, fabrication and installation of canopy structures and fascias, installation of underground tanks, installation of dispensing pumps and related pipe works and all signage works

PIPELINE CONSTRUCTION

We can virtually construct all types of pipe works from galvanized to steel pipelines for water, fuel and gas, high pressure application above and underground pipeline, jetty lines and pipe under water with mooring points. This includes all the necessary tests for welds and pressure testing.

LOADING GANTRIES

We also construct Loading Gantires and other road Truck and Wagon loading metering system. Of recently we have installed some Automatic Tank Level gauges for one company in for some of their service Stations to control dumping practices and ensure best returns for their investment in service stations

ELECTRICAL CONTRACTOR

Coca-Cola

Tank Renovations, cleaning, Decommissioning and Demolition

These works requires special experience and basic safety procedures with which our staff is well equipped. We can guarantee accident free workman ship on this particular field by observing the stringiest safety standards.

Testing and Commissioning

BITEC INTERNATIONAL can carry out to the satisfaction of our clients all kinds of tests related to the above-mentioned activities. These include but not limited to pressure tests, radiography, hydrostatic tests, leak tests, magnetic particles etc. All these tests can be done with strict adherence to both local and international standards

PERSONNEL AND STAFF

BITEC INTERNATIONAL CO.
LIMITED is well equipped with both
personnel and equipment with which it
is able to carry out all the above-
mentioned works in any environment.
It can also work out side the country
depending on our clients needs

Resumes for the following Key
personnel are attached:

- Managing Director
- Project Manager

PERSONAL PARTICULARS

SIRNAME: SHIMIYU
OTHER NAMES: MICHAEL, SHAABAN
DATE OF BIRTH: February 09, 1964
NATIONALITY: TANZANIAN

ACADEMIC QUALIFICATION

Masters In Entrepreneurship and Enterprise Development -USDM 2010
B.Sc. in Engineering (Mechanical) -UDSM 1991
ACSE (Advance Certificate of Secondary Education)
CSEO (Certificate of Secondary Education Ordinary Level)
CPE (Certificate of Primary Education)
SKILLS AND KEY EXPERIENCE

Technical and Engineering Skills

Maintenance of vehicles, machines and heavy construction equipment
Construction, operation and maintenance of Petroleum Storage facilities/Depots/Terminals
Construction, installation and operation of Petroleum Distribution and Dispensing facilities
Operation and Maintenance of LPG Storage and filling facilities
Construction and maintenance of steel structures

Construction projects management

Business Management Skills

Business and enterprise start up and development
Market research and development
Projects pricing and profitability forecasting
Finance management and administration

Safety and Environmental Management

Fire safety and fire fighting
Emergency response planning
Industrial safety training
Industrial Safety Inspection, Hazard identification and control
Basics on First Aid

IT skills

Office programmes including Microsoft Project
JDE operations
Auto Cad stage 1 – drafting

Communication Skills

Business communication skills and report writing

HSE policy statement

BITEC INTERNATIONAL is committed to fulfilling its duties as an employer to protect the health, safety and welfare of all employees in BITEC INTERNATIONAL and visitors and others who may be affected by its undertaking, in so far as is reasonably practicable. BITEC INTERNATIONAL is further committed to fulfilling its duties for protecting the environment

Duties referred to above, are legal and contractual duties which apply to the operations of BITEC International, but also to those duties that managers and other employees of BITEC INTERNATIONAL have in applying BITEC's Guiding Principles in their respective work. These include a commitment to perform the business and work processes of BITEC INTERNATIONAL in such a way that they do not contribute to the burden of ill health of any person, or fail to protect and improve the environment whenever we can.

Management of health, safety and environment (HSE) is seen as a fundamental managerial responsibility of equal importance to other management activities and objectives. As such it is expected that HSE will be managed to the same high standards as any other activity within our business. Success in this area is critical to achieving our Company objectives. BITEC INTERNATIONAL recognizes the fact that HSE has positive benefits to the organization and commitment to a high level of performance in the area of HSE makes good business sense.

It is BITEC INTERNATIONAL's policy to establish and maintain systems of work, work equipment, protective equipment and working and living conditions in line with industry best practices in order to fulfill our duties with respect to health, safety and environment. The proactive management of HSE within the workplace is seen by BITEC INTERNATIONAL not only as a legal duty but also as good practice which will help prevent work related accidents and ill health, increase employee morale and motivation, and lead to a reduction in unnecessary financial loss.

We will protect employees and others from foreseeable HSE risks, and will enlist the active support of employees in achieving such conditions. Every employee, at whatever level must be concerned about HSE and will be expected to act responsibly at all times, doing all that they can to avoid injury or any other negative impact on others or the environment. It is their duty to read, understand and comply with the contents of this policy and to work in accordance with any training or information they have been provided with.

The senior operating executive for each operational unit is responsible for achieving favorable HSE and loss prevention results and as such will undertake personal responsibility for the assessment and subsequent control of health and safety risks which may arise out of his/her unit's activities.

In recognition of its duties, BITEC INTERNATIONAL commits itself to:

- Promote standards of HSE that will, as a minimum, comply with the provisions and requirements of the applicable health and safety and environment legislation in the countries of operation, all other statutory provisions and codes of practice relevant to our undertaking as well as our own country
- Provide all employees, including temporary staff, with sufficient information, instruction, training and supervision that they need to work safely and efficiently, and to develop awareness among our employees on occupational health and safety, HIV/AIDS and on how to minimize negative impact on health, and environment
- Define individual responsibilities for HSE matters; Provide and maintain a system to ensure that incidents and 'near misses' are fully investigated and appropriate action taken to reduce the likelihood of their reoccurrence.
- Encourage full and effective joint consultation on all HSE matters; and
- Conduct periodic reviews and revise the policy where necessary to ensure it remains relevant and effective, and to make policies easily available to all employees.

In deciding what is 'reasonable' we will take into account business, economic and work constraints but will not compromise on HSE.

We must continuously use our skills to make all of our facilities, new and old, as free as possible of sources of potential harm to people or the environment. This policy has the full support of me and the Board.
